

One Step Seal & Finish · Exceptionally Long Wearing
Ultra High Gloss · Slip & Scuff Resistant
Non-Yellowing · Highly Resistant to Soil
Super High Density

- ◆ **SLIP RESISTANCE (ASTM D2047)**
- ◆ **RECOATABILITY (ASTM D3153)**
- ◆ **DETERGENT RESISTANCE (ASTM D3207)**
- ◆ **REMOVABILITY (ASTM D1792)**
- ◆ **SOIL RESISTANCE (ASTM D3206)**

DESCRIPTION:

DURATION is an outstanding one step floor seal and finish that really lives up to its name. It is specifically formulated to produce maximum gloss without buffing or polishing. High density acrylics provide an exceptionally hard layer of protection making Duration ideal for the toughest high traffic areas. Duration will bring unequaled beauty and protection to your floors without the time and attention usually associated with floor maintenance. **DURATION** is suitable for nearly all hard floor surfaces and may be used on vinyl, terrazzo, stone, brick, vinyl composition, slate, Mexican tile, concrete, rubber, asbestos tile and other floors.

DIRECTIONS:

For best results, all previous floor finish and soil should be completely removed from floor. Allow floor to dry. Seal and finish with **DURATION** by spreading product evenly over floor area. Avoid excessive agitation and do not allow material to dry in puddles. Apply 3 to 5 coats. Make sure finish is completely dry before applying additional coats.

MAINTENANCE:

Maintain in the conventional manner by cleaning with a treated yarn dust mop to remove surface dirt daily. Damp mop or clean with an automatic scrubber as required, using an approved neutral cleaner at the specified dilution. Spray buffing to remove embedded soils is recommended. Worn areas, or the entire floor, may be recoated as required to maintain a uniform high gloss. When stripping becomes necessary, use **MOP OFF** according to label directions.
