

## USE ON

**MARINE EQUIPMENT**

**UNDERCOATING**

**STORAGE OF TOOLS & DRILLS**

**FARM & ROAD MACHINERY**

**FINISHED OR FABRICATED CASTINGS**

**VALVES**

**STAMPINGS**

*Complies with MIL-C-16173D-Grade 4 and MIL-C-83933A*

### DESCRIPTION

PROTECTO FLEX is a long term, flexible, non-tacky, dust-resistant coating that will not crack, peel, flake or check over a wide temperature range (-40°F TO 175°F).

PROTECTO FLEX leaves a translucent film that allows protected parts to be seen.

PROTECTO FLEX can be flushed off easily with mineral spirits whereas other coatings are difficult to remove and usually require special solvents.

### DIRECTIONS

Make sure surface is clean and dry. Apply a thin uniform coating. Allow approximately 5 minutes to set up. For more severe storage conditions, a second coating can be applied within a few minutes. Complete setting of protective coating takes approximately two hours after application.
